**Abstract:** The research tries to describe how is the deepest knowledge about taboo, especially for social dimensions on the Internet; of course, it is as knowledge power Analysis for identifying transferable saying English Taboo in the internet and attempts to identify categories of English taboo words and to know them which the most dominant used by tweeps on their twitter. This research used an analysis of the document method systems. The populations of this research were 48 people. The samples of the research were 12 people. This research used simple random for sampling techniques. This research instrument was checklist, which consists of five categories of taboo words based on Eschholz. The data were collected and analyzed by observing the time line of the twitter, copied or printed screen status that contain taboo words, classified taboo words based on Eschholz theory and categorized the functions of taboo words based on Lancker (1987). The research results showed that tweeps used 34 taboo words on their twitter in 105 statuses. The frequency of taboo words on the twitter were 178 times. The taboo words that tweeps used the most dominant on their twitter was “*fuck*”. In this research, there were five categories of taboo words used by tweeps on their twitter based on Eschholz sex and anatomy was the most dominant categories of taboo words. The tweeps used taboo words to show their anger, frustration, joy, and surprise.

**Keywords:** Taboo words, Twitter

## Introduction

The views of social dimension in Internet have described something new especially for social media that shown the biggest effect for our life. Globalization development era is one of factors that caused the increasing of technology. The Technology and need must be balanced means that new technology had better give knowledge for helping and making something easy. One of technologies is twitter, because it is a net information that consists of 140 characteristics, it is called tweet. This is a simple way to find some news or something is occurring especially about everything interested. Twitter is the most popular online micro-blogging service. It's a great place to reconnect with old friends and very useful for someone who wants to talk to their favorite actress or actor. Not only that, it's also a great place to connect with family members especially children. According to sethi (2009:7) twitter is a simple service that lets you follow anyone. In the Twitter, we also found unfamiliar words that could not understand the meaning of words, they are taboo categories because the term taboo language refers to words and phrases that generally considered inappropriate in certain context.

Communication context creates a new taboo language that depend on situational communication. Everyone is also build speaking character especially how to make good communication by taboo, so that it can give describing that taboo language is still used by people. Anyone literally means anyone: you can follow your friends, your family, companies or even celebrities like Barack Obama or Britney Spear. Because of the way it's designed, one person ( for example Britney Spear) can send out a message from his or her phone and every single follower will receive message and interact via website. By using twitter everyone can communicate to others without face to face and without knowing each other.

There are many key twitter jargons on the twitter such as tweet, @messages, retweet, DM, tweetup and fail whale. The person who uses the micro-blogging service "twitter" calls as a tweep. The tweeps can share their feeling on the tweet area that no more than 140 characters. Not only it but also the tweeps can announce and track important events, such as parties and gathering. Tweet is tweeps activities that show to other on timeline based on their feeling, their activities or other. The tweet is short text messages that are post for public viewing by all of people around the world and all of the words they write by will find and read by the other around the world. When the tweeps make tweet, not alla use good words. Many tweeps write taboo words on their timeline that read by other. For example one of tweet quoted from joko prayono : "@justinbieberDamn so shit I love music too my love"

In the semtence above, the readers of his status can understund that the writer was joko prayono however he used "damn" as a taboo word on his

tweet. Twitter can consist of important information that can give accurate describing for users. Every tweet has different meaning that base on the tweeps feeling and situation. Tweeps use language an their tweet often to investigate likes:

1. Request its mean the tweecos want take some help.
2. Advice its mean the tweeps want some solution to solve problems or the tweeps give some solution for some problems.
3. Prohibition its mean the tweeps want other avoid something or don't do something. Such as don't use drugs.
4. Command its mean the tweeps want other do something. Such as say no to drug!

One negative impact from twitter is tweeps share many different words that not all good words. The words call taboo words. Taboo word is a word that forbidden to say; based on the culture and norm of society. According to the fairman (2009:27) taboo words are things that you're not supposed to say and he adds taboo word relating to sex. In this small study, researchers examined about taboo words used by tweeps. In this research, the problem are formulated as what are the categories of taboo words used by tweeps on their twitters and what are the taboo words that dominantly used by tweeps on their tweet ? Based on the problem formulatings, the objective of this research is to find out and describe taboo words used by tweeps when they express their feeling. This research is focused only on tweet by Indonesian people who love Just Bieber that follow by the reseacher.

### **Method**

The method employed in this research. The discussions included method of the research, research object, collecting the data, and analyzing the data. This research is qualitative research. According to Donald (2010:23) Qualitative research is based on a different philosophical approach, which sees the individual and his or her world as so interconnected that essentially the one has no existence without the other. It sees social reality as unique; thus, researchers can only understund human behavior by focusing on the meaning that events have for the people involved. You should look not only at what people do but also at how they think and feel. And you must attempt to understund their realities. The intendent result of a qualitative research study is a narrative report so rich and comprehensive that you can understund the social reality experienced by the participant. Furthermore, because researcher doesn't know in advance how naturally occurs that the events will unfold or what variables may be important, they do not begin a study with hypotheses. This research used document method. According to Donald (2010:27) Document or content analysis focuses on analyzing and interpreting recorded material within its own

context. The material may be public records, textbooks, letters, films, tapes, diaries, themes, reports and so on.

According to Fraenkel (2006:92), Population is the larger group to which one hopes to apply the result. He sums that population is the group of interest to the researcher, the group to whom the researcher would like to generalize the result of the study. Population in this research are Indonesian belieber (Justin Bieber's fans) that followed by the researcher who used taboo words on their tweet. The amounts of population are 48 people that show on the table bellow:

According to Fraenkel (2006:92), sample is a group in a research study in which information is obtained. Based on the Sapsford (2006:26) a sample is a set of elements selected in some way from a population. Arikunto (2006:134) stated that sample is part of population being studied. She suggests that if the subject in the population is less than 100, it is better to take the entire subject. But if the number of the subject is more than 100, the research should take 10 % -15% or 20 % - 25% or more. In choosing a sample, she said that the sample can be depending on the situation;

- a. The ability of the researcher based on time, effort, and funds
- b. Narrow or a wide area observation of each subject, because it involves many small databases
- c. The size of the risk borne by the researcher. To study the great risk, of course if a large sample, the result will be better

Based on the explanation above, the writer takes 25 % from the population of the data (48 people) in this research, the researcher chooses 12 samples. The technique of sampling that used in this research is sample random sampling. Fraenkel (2006:95) said that sample random sampling is one in which each and every member of the population has an equal and independent chance of being selected.

The instrument of this research is a checklist of categories of taboo word that consist five categories of taboo words. They are:

1. Sex and Anatomy
2. Excretion and Bodily function
3. Religion
4. Name
5. Interest

A method of data collection is the most important in a research. In collecting the data, the researcher used following steps:

1. The researcher log in to [www.twitter.com](http://www.twitter.com)
2. The researcher do observation to the following people
3. The researcher copied or print screen of the laptop or hand phone that contain taboo words.

In analyzing the data, The researcher used the following steps:

1. The researcher identified which ones are included in the taboo words and which are not included in the taboo language
2. The researcher classified categories of taboo based on the contexts of situation according to Eschholz theory.

**Table 3. Checklist of Categories of Taboo Words**

No	taboo words	Categories of taboo word				
		Sex and Anatomy	Excretion and bodily Function	Religion	Name	Interest

3. The researcher counted the percentage of taboo words used by tweeps and kinds of taboo words by using formula:

$$P = \frac{F}{N} \times 100 \%$$

P = Percentage

F = The number of taboo words

N = Total number of taboo words

4. The researcher identified and classified the function of taboo words  
 5. The researcher analyzed and interpreted the data  
 6. The researcher made the conclusion.

### 1. Definition of Taboo and taboo words

A taboo is defines as a restriction or something not allows by a culture or norm of the society. It does arise out of social constraints on the individual's behavior where it can cause discomfort, harm or injury. According to Fairman ( 2009:27) taboo is a proscription on a behavior for a spesific community in a specific context. In every culture, there are both taboo acts (things that you're not supposed to do) and taboo words ( things that you're not supposed to say). Taboo is something which is forbidden, because it's against the religion or social custom said ( Trudgill 1983:94).

Allan and Burridge (2006) sum that taboo is a proscription of behavior that affect everyday life. On the other side, Steiner (1986:20) said that taboo is concerned with; (1) all the social mechanisms of obedience which have ritual significance; (2) specific and restrictive behavior in dangerous situations;; (3) the protection of individuals who are in danger, and (4) protection of society from endangered and therefore dangerous person. He also said in freitas ( 2008:1) that taboo can be defined as "a set of attitudes towards dangerous situations".Every society has different culture and norm. In daily conversation human used different language to

communicate. While speak the human can't show all of their felling using good words. Sometimes the human use words that forbidden to say it's called taboo word. According to Fairman (2009:27) the english word *taboo* comes from the Tongan word *tabu*. Its things that you're not supposed to say and it's relating to sex. The word taboo was borrowed by Captain Cook in 1779s from Polynesian people behavior and language. Captain Cook and fellow shipments recorder *taboo* as a significant local word meaning forbidden, such as when a thing was not to be eaten, entered, or touched. Swan in Agustina (2005) said many language have words whis considered dangerous, holy, magic or shocking, and which are only used in certain situations or by certain people. The kinds of words called "taboo words". From some experts opinion above, can be taken a conclusion that the taboo words are words that express reality which coarse and vulgar and forbidden to say, so the human tent to avoid it in formal atmosphere and are not accepted in the community, but still needed to specific purpose because its is a social phenomenom language.

### **3.1. The History and Categories of Taboo Word**

According to Fairman (2009:27) the english word *taboo* comes from the Tongan word *tabu*. in the 1770s, Captain James Cook explored the pasific islands and observed the behavior of the polynesian people. In their hourjals, Captain Cook and fellow shipmates recorded *taboo* as a significant local word meaning forbidden, such as when a thing was not to be eaten, entered, or touched. 74 likely due to this origin, taboo is a trait often associated with so-called primitive cultures. This is mistake. Taboo exist in primitive societes and western contemporary ones alike. Allan and Burr ridge (2006:2) sum that the English word *taboo* derives from the Tongan word *tabu*. Which came to notice towards the end of the eighteenth century. Still in the book, Radcliffe-Brown said "In the language of polynesia the word means simply 'to forbid', 'forbidden', and can be applied to any sort of prohibition. A rule of etiquette, an order issued by a chief, an injunction to children not to meddle with the possesions of their elders, may all be expressed by the use of word *tabu*'. Taboo words are sometimes found in the communicatiob activity in the society. Wardaugh (1986:236) stated that taboo is the prohibition or avoidance in any society of behavior believed to be harmful to ots members in that it would cause then anxiety, embarassment, or shame. It is an extremely strong politeness constarin. Taboo word was defined by many linguistic. Allan and Burr ridge (2006:1) dived taboo into five categories, they were:

- Boddies and their effluvia (sweat, snot, facces, menstruasi fluid, etc.);
- The organs and acts of sex, mictrution and defacation;

- Diseases, death and killing ( including hunting and fishing );
- Naming,addressing,touching and viewing persons and sacred beings, object and places;
- Food gathering, preparation and sonsumption

There are many linguistist that have explanation about the kinds of taboo words. In this reseacrh the researcher tajes one of the linguistist' theorist that are theory based in Eschholz. Eschholz (1978) divided taboo words into five categories they were:

1. Sex and anatomy. It's mean gender, either of two divisions, male or an act sexual intercourse.  
 e.g.ass,fuck,sex, etc
2. Excreation and bodily function, its means all bodily function like hand, finger ear,etc  
 e.g.shit, bullshit, piss, off, etc
3. Religion, its mean belief in something mystics but real  
 e.g.goddamn,hell, etc
4. Name, its mean choose or name animals  
 e.g.dog,bitch, etc
5. Interest, its mean something object can make human always remember about that.  
 e.g.love talk in the bedroom: be hot, kiss,miss, etc

### **3.2. Definition and history of twitter**

Twitter is the most popular social network and the most popular online micro-blogging service. It's a great place to reconnect with old friends. It's also a great place to connect with family members especially children. Users of the twitter call tweeps. The tweeps started 13 years old until older. Brad and schepp ( 2010:171) said that twitter has taken off like a wildfire that estimated by the wall street journal that about 4 to 5 million people use the service. Still in brad and schepp (2010:171) twitter is a way for people to track what their friends were doing between e-mails, blog post, and other slower types of communications. He sums that twitter is free, doesn't ask you to input your life story or even anything nearly as detailed as whay you entered for your Linked in Profile.Sethi ( 2009:7) said that twitter is a simple service that lets you follow anyone. Anyone literally means anyone: you can follow your friends, your family, companies or even celebrities like barack Obama or Britney spear. O'reilly and milstein ( 2009:7) sums that twitter is mesaaging service that shares a lot of characteristics with communication tools you already use. Twitter was created in march 2006 by Jack Dorsey, Evan williams, Biz Stone and Noah Glass and by

July 2006, the site was launched. The service rapidly gained worldwide popularity, with 500 million registered users in 2012, who posted 340 million tweets per day the service also handled 1.6 billion search queries per day. O'Reilly and Milstein (2009:5) states that in March 2006, a little communications service called twitter debuted. It began as a side project at a San Francisco podcasting company, but it wasn't long before the side became the main event. Brad and Scheep (2010:171) said that twitter launched in 2006 as a way for people to track what their friends were doing between e-mails, blog post, and other slower types of communications. He sums that twitter has taken off like a wildfire in October 2008 grew by more than 750 percent year to year (from average of 500,000 per month to 3.5 million per month). **Initialization in twitter** O'Reilly (2009:25) states that following is the way nearly everyone sees other people's messages is by choosing to get a stream of update from people they're interested in. **Hashtag**, O'Reilly (2009:3) states that hashtag is a term, prefixed by the # symbol that helps people categorize message in twitter. **Key twitter Jargon**, There are many key twitter jargon based on O'Reilly (2009), they are:

- **Tweet**  
 O'Reilly (2009:43) said that tweet is a term created by users in twitter (tweets). The term is also sometimes used as a verb, as in.
- **@message**, Sethi (2009:8) sums tweet is a single twitter message.
- O'Reilly (2009:43) said that @message used by users to send a public message or refer to somebody on twitter and it's also a link to that account page. @message sometimes called @mention or @ replies are a key of networking on twitter, helping somebody discover new people.
- **Retweet**
- O'Reilly (2009:47) said the Retweet is one of the silliest-sounding terms floating around twitter. He sums that retweet also a simple the act of reposting somebody else's cool or insightful or helpful tweet and giving them credit. Sethi (2009:8) sums that Retweet is when you forward an interesting message from one of your friends to the rest of your followers.
- **DM**, O'Reilly (2009:49) said that DM is direct messages that fit the usual 140 character mold. DM only uses for somebody who follow you and you follow that one. Sethi (2009:8) sums DM (direct message) is a message that can only be seen by you and a friend.
- **Tweet up**  
 O'Reilly (2009:51) said that tweet up is preplanned or spontaneous. It's an in-person gathering organized largely via twitter. Tweet up

can draw a mix of people who don't already know each other ( even on twitter), generating new connections.

- Fail whale

Twitter has grown quickly. As a consequence of that succes, the service conks out often. How often? Frequently enough to have its own logo for downtime. Infamously known as the "Fail whale," state O'reilly ( 2009:53)

### 3.3 The Uses Of Twitter and Justin Bieber

Sethi ( 2009:8) said that twitter can be used for tons of purposes such as connecting with friends, amerketing your company, and responding to customer service request. There are many function of twitter. O'reilly (2009) explained about the function of twitter, there are :Twitter is a great tool for sharing common experiences

- Sharing news and comentary

- An amazing mind-reading tool, letting you see not just what individuals are thingking about , but what groups are focusing on, too.

Twitter is emerging as a key business channel, letting companies engage with customers, partners and other constituents in a direct way that's both personal and public—something no other medium allows..**Justin Bieber** is a Canadian pop-R&B singer. He was born on March 1.1994 in London, Ontario and was raised in Statford.Ontario, CANADA.Justin Bieber's mother, Pattie Mallette, was 18 years old when she became pregnant with her son. Mallette, who worked a series of low-paying office jobs, raised Justin Bieber as a single mother in low-income housing. However, Justin Bieber maintains contact with his father, Jeremy Bieber, who married another woman and had two children. Justin Bieber's paternal great-grandfather was a german immigrant to Cannada.During his childhood, Justin Bieber was interested in hockey, soccer, and chess: he often kept his musical aspirations to himself. As he grew, Bieber taught himself to play the piano, drums, guitar, and trumpet.In early 2007, when he was 12, Justin Bieber sang Ne-Yo's "So Sick" for a local singing competition in Stratford and placed second. Mallette posted a video of the performance on youtube for their family and friends to see. She continued to upload videos of Bieber singing covers of various R&B songs, and justin Bieber's popularity on youtube grew.In 2008, Justin Bieber was discovered bt Scooter Braun, who happened to come across Bieber's videos on youtube and later became his manager. Braun arranged for him to meet with Usher in Atlanta, Georgia, dan Bieber was soon signed to Raymond Braun Media Group (RBMG), a

joint venture between Braun and Usher, and then to a recording contract with Island Records offered by L.A Reid. His debut single, "one time", released worldwide in 2009, charted in the top 30 in over ten countries. His debut release, *My World*, followed on november 17, 2009, and was eventually certified platinum in the United States. Justin Bieber became the first artist to have seven songs from a debut album chart on the Billboard Hot 100. His "My World 2.0" was released on March 23, 2010 and has since received similar success: it debuted at number one and within the top ten of several countries and was certified platinum in the United States.

### Result and Discussion

The researcher found 178 times taboo words used by tweeps on their twitter. The taboo words that existed in twitter could be seen in table below:

**Table .4 Taboo Words used by tweeps on their twitter**

No	SENTENCES	TABOO WORDS
1	Minta antarkan saddam kesana yo mah wkwk @mahdaismi_:shit! Believe movie yang di kalimantan, Cuma ada di kal_tim. Trus gue yang di Kal-Sl	Shit
2	Shit! Why this girl threw a bottle over him?!	Shit

Every society has different culture and norm. According to Fairman (2009:6) there are things that we are not supposed to do sure things, and we are not supposed to say; taboo acts and taboo words. Taboo words are words forbidden to say. Van Lancker (1987) said the reasons for using or not using taboo words depend on the conversational goals of the speaker. This can be used to signify a number of emotion; anger, frustation, joy, and surprise.

- a. Anger  
Anger is feeling that makes people want to quarrel or fight
- b. Frustation  
Frustation is feeling that makes people upset and discourage, a feeling of annoyance at being hindered or criticized
- c. Joy

Joy is great happiness. It's feeling that makes people happy. It's also success in doing, finding, or getting something

d. Surprise

Surprise is something sudden or unexpected

#### 4.1 Ass , Bitch and Bitches

Hughes (2006:12) said that ass is the part of the anatomy and this emissions are. Axtell (1995:60) sums that ass is a fool but not as rude as in American, where it refers to a part of anatomy. According to online slang dictionary (accessed on November: 2013) the word of ass used after an adjective to indicate extremes or excessiveness; "very", "really", "extremely". It's can be as noun that has meaning anything displeasing, one's self or one's body, one who exhibits complete ignorance and disregard for social norms. Customs, and practices. Allan and Burridge (2006:89) stated that the word ass was used mainly as a body part by males.

In the British ass word is arse wrote by macmillan dictionary ( Accessed on November: 2013). It's: Part of body you sit on ( A person's buttock), Stupid/annoying person ( Calling someone an ass means that they are being a jerk or rude. It is considered an insult to call someone an ass ) Donkey ,For emphasizing orders.The used of taboo words "ass" in twitter that used by tweeps are:
